

Smithsonian Early Enrichment Center
SUNSCREEN PROCEDURES

SEEC provides Rocky Mountain SPF 30 "Kids" Sunscreen for use on all SEEC children, except those with known allergies. SEEC will apply this sunscreen during the spring, summer, and fall months for application before going outside in the afternoons. Families will continue to apply their own sunscreen to their child each morning to protect during the morning hours. Using one sunscreen brand for most children at SEEC will save time and confusion, as well as lessen chances for cross contamination and allergic reactions. Please sign the form in the appropriate place below. For children with allergies, the parent/guardian must designate the brand they will provide and obtain a doctor's signature. For more information about this sunscreen product please go to: www.rmsunscreen.com.

(Child's Name)

(Class)

I give permission for SEEC to apply Rocky Mountain SPF 30 "Kids" Sunscreen to my child as needed.

(Parent/Guardian's Signature)

(Date)
